

Eco-Friendly Paddy Husk Plates | 100% Biodegradable & Compostable Tableware

Eco-Friendly Paddy Husk Plates | 100% Biodegradable & Compostable Tableware Upgrade your dining experience with our premium Paddy Husk Plates. Crafted from repurposed agricultural waste, these natural brown plates are the ultimate sustainable alternative to plastic and Styrofoam. Durable, heat-resistant (to), and home-compostable within 30 days, they are perfect for everything from high-end weddings to casual picnics. Available in 6, 8, 10, and 12-inch sizes.

The Ultimate Sustainable Dining Solution

Our **Paddy Husk Plates** represent the perfect synergy between modern convenience and environmental responsibility. Made from the outer shell of rice grains—a byproduct that is often burned—these plates help reduce carbon emissions while providing a sturdy, leak-proof dining surface.

Unlike paper plates that turn soggy or plastic plates that harm the planet, our husk plates offer high water retention for up to one hour. Whether you are serving hot appetizers or cold desserts, these plates maintain their structural integrity across a wide temperature range.

Why Choose Paddy Husk Over Bamboo or Plastic?

- **Zero Waste Lifestyle:** These plates don't just disappear; they transform into nutrient-rich organic manure for your garden in just 30 days.
- **Farmer Empowerment:** Every purchase generates additional income for farmers, turning agricultural waste into a valuable resource.
- **Versatile Performance:** Safe for use in the freezer (down to) and for hot food (up to).
- **Uniform Quality:** Each plate is precision-crafted at a consistent weight of 100g, ensuring a premium feel for guests at 5-star hotels and resorts.
